

INTERFACE FOR CONFIGURING INTERNET COMMUNICATIONS ON A Z SERIES COMPUTER

ABSTRACT

A method for configuring Internet settings on a zSeries compatible computer can include the step of providing a graphical user interface including at least one control. The graphical user interface can be configured for a multiple virtual storage operating system, an OS/390 operating system, and/or a z/OS operating system. Data contained within at least one configuration file containing Internet settings for the zSeries compatible computer can be accessed. The accessed data can be displayed within the graphical user interface. Data within the configuration file can also be altered responsive to manipulation of the control.
